Crystal Protect 150

Ultra clear and highly durable, Crystal Protect 150 is designed to protect your car body against day to day attacks. Its self-healing properties ensure a glossy finish at all times: sunlight or other heat source will repair small scratches made on Crystal Protect 150 film.

Crystal Protect 150 is simply the ultimate protection for your car paintwork.

Wing Mirrors

Wheel Arch

A Pillar

Headlight

Protect against chips without decrease in lighting

Bonnet

Door Handle Cup

Protect against marks from jewellery and key scratches

Wings

Front Bumper

Advantages:

- Optimum protection against stone chips, scratches, vandalism, pollution, and corrosion.
- Practically invisible once applied, thanks to its exceptional transparency.
- The film does not yellow and requires no specific treatment or maintenance.
- UV resistant, without filtering the rays to avoid colour differences between covered and non-covered sections.

Product specifications

Polyurethane Film

150 µm

PET Liner

8 years durability
