

# Mactac self-healing wrapping solutions

## Cosmetic protection against ageing

Ultra gloss, long lasting and flexible, Mactac self-healing films will keep your car with an... almost perfect look! With the help of sunlight or any other heat source, marks & small scratches quickly disappear!

Whatever surface you need to protect, you'll find the ideal solution in Mactac's self healing product range:

### Direct application on the surface

#### Self-healing coloured film: CastRap 189-00 BF - Evershine

#### Features:

- 120 µm high gloss black dual layer film (cast PVC/PU)
- B-free adhesive
- 5 years durability

#### Benefits:

- Deep black gloss finish
- Ease of application
- Offers superior protection against abrasion, UV light and acid rain

#### Application:

Designed for wrapping of vehicles and boat hulls\*

#### Self-healing transparent film: CrystalProtect 150

#### Features:

- 150 µm optically clear gloss polyurethane film
- 4 years durability

#### Benefits:

- Practically invisible once applied, thanks to its exceptional transparency
- Optimum protection against stone chips, scratches, vandalism (key scratches), pollution and corrosion.
- UV resistant, without filtering the rays to avoid the colour differences between covered and non-covered sections.
- Fast and easy installation

#### Application:

Designed to protect painted bodywork, underbody, bumpers and covers of wing mirrors, against chips caused by stones, insects, etc.
